## INTRODUCTION.

ABOUT twenty years ago, Mr. E. J. Snow, of Baltimore, and the writer, who soon after became a resident of that city, commenced life together as amateurs and collectors of *rare old coins*; we followed our pursuit in great harmony until the breaking out of the war in 1861. Returning to New York in that year, I brought with me all of Mr. Snow's American Coins, leaving with him my own acquisitions, which had been mainly in the early English series.

The great Gilmour collection was then breaking up, and out of it I had obtained many valuable pieces, among them the pattern groat of Edward I., No. 272 of this catalogue, and the Indian Medal of George II., No. 490, of which I have never seen another example. Since that time Mr. Snow has made constant additions to his cabinet, purchasing largely of myself in the earlier years, and directly from Lincoln & Sons, London.

The rare and interesting medal of Henry IV. of France, struck to commemorate the battle of Ivry, was brought to this country by Mr. Barthold, of Baltimore, who died many years ago.

The many beautiful coins and medals of Mexican mint were from the Collection of Brantz Mayer, Esq., who had been a member of the American Legation to Mexico before the war, and author of a valuable work on that country.

Those who have the names of purchasers at the Mickley sale, may see how many valuable coins Mr. Snow derived from that source; and when I add that Mr. Edward Cogan was for years a caterer for the same Collection, its variety will have been sufficiently suggested.

The number of pieces is not large, but they are generally as fine as possible. They have been catalogued with the most scrupulous care; my son, who has done most of the work, having referred every doubtful question to gentlemen of experience in the profession.

After a retirement of nearly two years, compelled by what at first threatened to be a total loss of sight, I esteem myself fortunate on my reappearance before my friends, in being able to make my début with this Collection.

W. H. STROBRIDGE.

# CATALOGUE.

## Coins of Mexico.

["Cob" money conformed to the lawful standard in weight and fineness, but was struck with the hammer without much regard to regularity of form or impression. The "8" which is so conspicuous on the dollars, signifies 8 reals, and, combined with the two columns which always appear rising out of the water on one side of the coins, becomes our dollar-mark—thus \$].
